

**Trinity Area School District
Template for Curriculum Mapping**

Course: Child Development II Grade: 9-12	Overview of Course This course will prepare the student for the care of three to five years of including the physical, intellectual, and emotional development of children. Included in this course will be a preschool program a few days a week where the students will prepare lessons to teach the preschool children.		
Overarching Big Ideas, Enduring Understandings, and Essential Questions (These “spiral” throughout the entire curriculum.)			
Big Idea (A Big Idea is typically a noun and always transferable within and among content areas.)	Standard(s) Addressed (What Common Core Standard(s) and/or PA Standard(s) addresses this Big Idea?)	Enduring Understanding(s) (SAS refers to Enduring Understandings as “Big Ideas.” EUs are the understandings we want students to carry with them after they graduate. EUs will link Big Ideas together. Consider having only one or two EUs per Big Idea.)	Essential Question(s) (Essential Questions are broad and open ended. Sometimes, EQs can be debated. A student’s answer to an EQ will help teachers determine if he/she truly understands. Consider having only one or two EQs per Enduring Understanding.)
Balancing Family	11.4.12.D Analyze plans and methods to blend work and family responsibilities to meet the needs of children.	Blending family and work responsibilities appropriately can balance the needs of a family.	How can one have responsibilities to family and work and balance the time?
Safety	11.4.12.B Analyze current issues in health and safety affecting children at each stage of development	Practicing safety in the preschool will result in healthy children at each stage of development.	How can one provide a safe and secure preschool environment for children? How can the design of a preschool promote safety?
Environment	11.4.12.C Analyze practices that optimize child development (e.g., stimulation, safe environment, nurturing caregivers, reading to children)	Proper parenting skills will result in the healthy development of a child.	How can on apply parenting skills to take care of a child? How will you optimize a child’s development when working with them in a preschool setting?

* Some teachers may need to think about the assessments and resources used in order to determine the Big Ideas, Enduring Understandings, and Essential Questions embedded in their courses. At this point in your curriculum mapping, you might want to ignore the “Common Assessments” and “Common Resources Used” columns. However, you may use them if you wish.
